The \_\_\_\_\_ advisory board acknowledges that all classrooms and their included materials, curriculum, and environment are free of bias and accessible to all students. We strive to educate students of all races, religions, family, backgrounds, cultures, gender, abilities, and ethnicity with equal respect and consideration. Our program provides students of both gender with equal opportunities to take part in all activities. Our program provides an educational environment that fosters critical thinking, promotes empathy with diversity, and problem solving around fair/unfair situations, and promotes pro-action for self and others.
